3570 Series Electric Mortice Lock

Information

Designed and manufactured in Australia, the 3570 Series Electric Mortice Lock is a high performance lock of superior quality. It is constructed from high grade zinc alloy, with a stainless steel latch bolt and face plate and is suited for all commercial applications.

The lock can be operated by push buttons, intercom systems and key switches or integrated with electronic access control systems for use with higher security devices such as keypads or card readers.

Product Details

Voltage	12Vdc - 24Vdc operating voltage
Current	500mA (max) 80mA holding @ 12Vdc 275mA (max) 50mA holding @ 24Vdc
LED Current	When LEDs are fitted, add 15mA (max) to total current draw
Monitoring	Dual key override Deadlatched Locked Door closed Request to exit Microswitches: 500mA (max) @ 30Vdc each circuit Reedswitch: 100mA (max) @ 30Vdc
Environment	Operational temperature range -20°C to +60°C
Case/Cover	High purity zinc alloy construction
Backset	60mm standard, 89 and 127 mm available
Latch bolts	Reversible with stainless steel construction
Door Clearance	3 - 6.5 mm
Door thickness	Standard applications 32 to 50mm
Cylinder	Standard Lockwood oval shaped cylinders
Cabling	1.6 metre length of cable with 12 pin socket supplied with each lock Recommended cable: 18AWG (0.82mm ²) cable runs up to 30m
Furniture	Compatible with Lockwood series door furniture
Standard Finishes	Satin Chrome (SC) standard, Bright Chrome (CP) and Polished Brass (PB)

Standards and Compliance

S3 (Security) Australian Lock Standard (AS4145.2.1993) (when used with equivalent security level keying system)

D3 (Durability) Australian Lock Standard (AS4145.2.1993)

Successfully fire rated up to 4 hours on fire door assemblies in accordance with AS1905.1. 2005 (Part 1: Fire Resistant Doorsets)

C-Tick Certified

3570 Series: SCEC endorsed for intruder resistant areas

3579 Series: SCEC endorsed for secure areas

3570 Series Electric Mortice Lock

Key Features

Designed with flexibility in mind, the one lock can cover all functions and is easily configured on site for the required application.

Available in non monitored and monitored versions.

Monitoring Features:

- Dead latched and locked
- Door position/Reed switch
- Dual key override monitoring
- Request to exit/REX
- LED indication

Field Changeable Settings:

- Fail safe/fail secure configuration
- Multi-voltage - will work on 12-24 Vdc systems
- Handing - left hand and right hand doors
- Selection of free lever or locked lever on both sides of the door
- Key override monitoring either side of the door
- Monitoring contacts – normally closed, normally open (for key override and request to exit only)

Note: Width of case increases from 19mm to 23 mm for 3579 series SCEC lock

3570 Series Electric Mortice Lock

Dimension	Backset		
A	60	89	127
B	100	129	167

Specification Statement

The lock should be capable of operation on voltages between 12 – 24Vdc and have a current consumption not more than 80mA (holding) @12Vdc and 50mA (holding) @24Vdc. Monitored locks must be capable of monitoring the following functions: key override, door position / reed switch, selectable hub / request to exit and locking bar status. All monitoring outputs must have the ability to be wired independently. All settings including fail safe / fail secure, handing and hub selection must be field configured.

3570 Series Electric Mortice Lock

Ordering Procedure

Sample part number 3572ELAM2RSC is made up of several sections. Choose your product by selecting an option from each section.

		Fully monitored Lock including KOM (1 Cylinder) M1	
		Fully monitored Lock including KOM (2 Cylinders) M2	

Ordering Notes

- 3570 primary locks can be set to achieve all lock functions post purchase, and should be the preferred option when ordering.
- Customised locks are available upon request and incur an additional surcharge and 10 day lead time.
- Securafix locks are available in 60mm backset only and are made to order. 10 day lead time.
- See over page for primary lock part numbers.

3570/3670 Series Proximity Mortice Lock and Furniture

Description

When security, safety, functionality and stylish design are a priority, there's only one solution – Lockwood Proximity Furniture!

Incorporating proximity technology within its sleek external door plate, the reader connects directly to a Lockwood Electric Mortice Lock.

Easy to install and operate, Lockwood Proximity Furniture is available in a wide range of stylish levers and finishes to enhance any contemporary building design, bringing a new dimension to commercial security locking solutions.

One Install – One Connect. Comprising the Lockwood Electric Mortice Lock, HID Proximity Reader and Door Furniture.

Proximity Furniture™ is available in standard “through fix” and Securafix specifications.

Product Details

HID Reader	HID 125KHz Proximity Reader Data Output: Weigand Supply Voltage: 5-12Vdc LED: visual indication of reader / lock status

C-Tick Certified

3570/3670 Series Proximity Mortice Lock and Furniture

Key Features

- Integrated proximity reader -125 Khz HID Prox
- One install one connect
- Fully monitored

Monitoring Features:

- Dead latched and locked
- Door position/reed switch
- Dual key override
- Request to exit/REX

Field Changeable Settings:

- Fail safe/fail secure configuration
- Multi-voltage - will work on 12-24 Vdc systems
- Handing - left hand and right hand doors
- Selection of free lever or locked lever on both sides of the door
- LED indication
- Monitoring contacts – normally closed, normally open (for key override and request to exit only)

Specification Statement

The lock and door furniture should encompass an integrated proximity reader, capable of reading HID 125khz proximity technology with card formats up to 85bits. Operational voltage should be between 12-24Vdc. The lock must be capable of monitoring the following functions: key override, door position / reed switch, independent hub / request to exit and locking bar status. All settings including fail safe / fail secure, handing and hub selection must be field configured.

3570 Series Room Guard Electric Mortice Lock Controller

Description

The Room Guard privacy controller system provides electronic lock control of multiple doors for any room requiring privacy by the occupants. The most common applications are shared ensuites in hospitals and conference rooms with two or more entry doors.

The system allows all doors to be locked and unlocked from any door in the system. Each lock provides a clear visual indication, both inside and outside, which displays the locked/unlocked status of the door at a glance.

Key Features

- Uses standard 3570EL Series Mortice Lock
- Non-handed – all settings are field configured
- One touch privacy
- Clear visual indication - LED furniture
- Unique integrated turn knobs
- Emergency override

3570 Series Room Guard Electric Mortise Lock Controller

Function

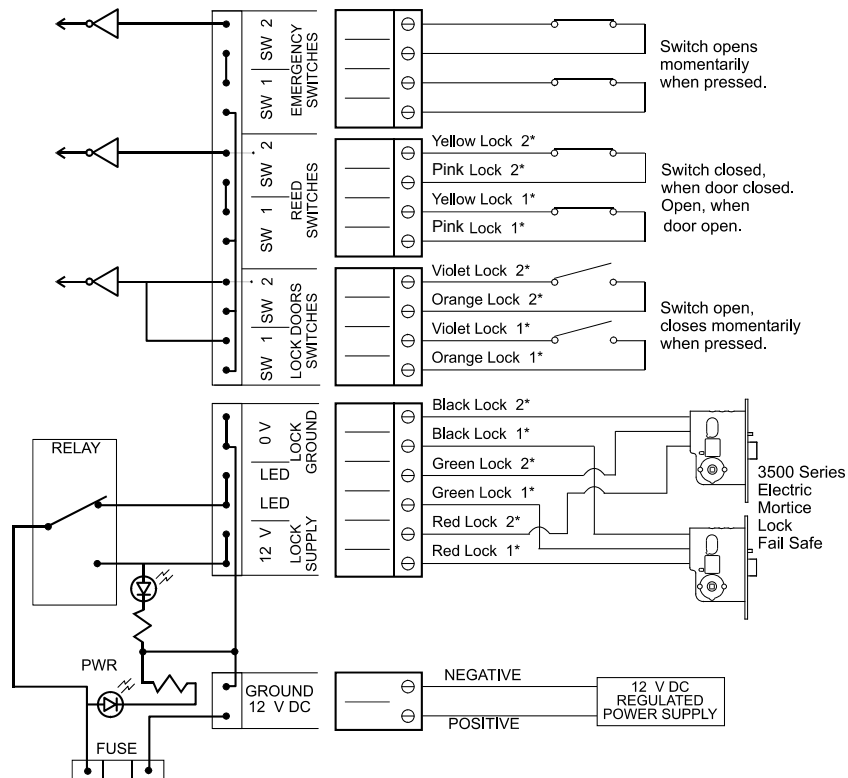

In the dormant state, all locks are unlocked and the LED on the external furniture plate indicates green.

To lock the lock

1. Close all doors
2. Activate one of the turn knobs located on the inside of the door
3. Simultaneously the lever handles on the outside of each door will lock and the LED furniture indication will change to red (inside lever will remain free at all times)

To unlock the room

1. Operate the inside lever of either lock
2. Simultaneously the locks will unlock and the LED furniture indication will return to green

Standard Two Door Connection

3570 Series Room Guard Electric Mortice Lock Controller

Ordering Information

Part Number	Product Description
RG2PS	Room Guard Privacy Controller plus regulated power supply (12Vdc, 1.5AMP)
RG2	Room Guard Privacy Controller
RG3SC	Turn knobs, designed for the integrated assembly with Lockwood Electric Mortice Locks <i>Other finishes available upon application</i>

A typical room with two doors requires the following equipment:

RG2PS or RG2	1 x Room Guard Privacy Controller
RG3SC	2 x Room Guard Privacy Controller turn knobs
3570ELMOSC	2 x Electric Mortice Locks
LC8810	2 x Power transfer devices
1822/70SC	2 x Exterior door furniture
1920/70SC	2 x Interior door furniture
SP3570-1055	2 x 7.5M extended cables

Note: Due to the variety of installation décor, Lockwood does not supply emergency release push buttons. However we recommend a Clipsal model 31 architrave mounting plate with model 30MBP push button, or equivalent, available from most electrical wholesalers.

Specification Statement

Locking control of the room must be via a standalone door controller independent of the building electronic access control system. The controller shall be capable of providing simultaneous locking/unlocking of up to 4 locks via internal integrated turn knobs. Emergency egress or unlocking to be achieved via single downward action of internal lever or externally mounted override switch. The locks should be capable of operation on voltages between 12 – 24Vdc. All lock settings including fail safe/fail secure, handing and hub selection must be field configured.

3580 Series Electric Mortice Lock

Accessories

Finish	Anti-clockwise	Clockwise
Satin Chrome	3580-2902ACWSC	3580-2902CWSC
Bright Chrome	3580-2902ACWCP	3580-2902CWCP
Polished Brass	3580-2902ACWPB	3580-2902CWPB

Description

Rebate kits to suit 13 mm rebated timber doors with a minimum backset of 30 mm include an adaptor to mount the lock and a special strike plate. Handing of the rebate kits is determined by the opening movement of the door on which the lock is fitted.

Extended Cylinders

"A" Cylinder Projection	Cylinder Length	Recommended Door Thickness
41	37	50 to 60
52	48	60 to 48
64	60	84 to 108
80	76	108 to 132
88	84	132 to 156

Description

Extended cylinders should be considered when door thickness exceeds 50 mm or when the lock is mounted off centre in the door edge. A range of cylinders is available to suit various door thicknesses. Refer to ASSA ABLOY Australia Keying and Restricted Price List for further information.

Power Transfer Lead Covers

The LC8810 and LC8811 Power Transfer Lead Covers are designed to ensure unbroken transfer of wires between door and frame in electric locking situations.

Features

- Provides unbroken connection from controller to lock, for cable up to 8 mm diameter
- Vandal-resistant chrome plated flexible steel
- Completely concealed when the door is closed

Applications

LC8810

The LC8810 is a shorter unit suitable for hinged doors which open to 90° (maximum of 120°).

LC8811

The LC8811 is designed for use on doors which open more than 120°, or have a gap from pin hinge to door frame of more than 20 mm.

Note: Not suitable for centrally pivoted doors.

Standards and Compliance

Successfully fire rated up to 4 hours on fire door assemblies in accordance with AS1905.1. 2005 (Part 1: Fire Resistant Doorsets)
