

AUTOMATED ENTRY CONTROL & CONTACT TRACING

Portable People Counting System

OCCUPANCY
Counts total people on your premises

ENTRY PERMITTED
Automatically allows access when store occupancy is below threshold

RESTRICT ENTRY
Restricts access when occupancy reaches the threshold (customisable)

MOBILE SUPPORT
Remote management and monitoring APP

Connect Security Products and 8 Development brings you an end-to-end People Management solution for retail, hospitality and transport businesses.

HOW DOES IT WORK?

A Bosch video analytic camera is placed at the shop entrance and counts people entering and leaving the premises.

Because it is using video analytics, it differentiates between people and objects (such as a shopping trolley).

It is also possible to monitor multiple entrances, adjust the number of people allowed in the premises, and record all entry/exit events, for tracing purposes.

BOSCH VIDEO ANALYTIC CAMERA

The Bosch video analytic camera uses the latest artificial intelligence technologies to ensure the highest level of accuracy.

- Customisable with your company-specific details
- Capable of adding your loyalty or VIP programme into the system
- Different form factors available for different applications
- Weather and vandal proof options

INTEGRATED APP & TOUCHSCREENS

Our HD Touchscreens include a custom-designed COVID tracing APP that incorporates:

- NZ COVID tracer with your company's QR code
- On-premises counter where you set the threshold number of occupants
- Smartphone APP to notify staff when the threshold is nearing and at capacity
- Integration with visitor management & loyalty programme systems (coming soon)

PACKAGE INCLUDES:

- 1 x Bosch Analytics Camera
- 2 x HD Touchscreens with all necessary software
- 1 x Tripod stand (for portable use) OR Camera mount for permanent applications
